OrthoWedge™ Healing Shoe
Effective Off-Loading Footwear

The DARCO OrthoWedge™ is clinically proven to reduce weight bearing pressure on the forefoot which promotes faster healing after surgery, trauma or when forefoot wounds or ulcerations are present.
OrthoWedge™ Features and Benefits:

› **15° Wedge Sole** effectively shifts body weight to the midfoot and heel. Reduces forefoot pressure by **as much as 57%!**

› **Square Toe Design** acts as a bumper to protect the toes when k-wires are present and provides better Left/Right fit.

› **Ankle Strap** seats foot firmly in shoe to reduce heel slippage and eliminate friction.

› **Removable Forefoot Closure** provides security while eliminating buckle pressure.

› **Zoned Outsole** has an aggressive tread under the mid-foot where traction is needed most.

› **Removable Insole** features twice the padding of standard insoles and can be modified as needed. Insole can be totally removed to accommodate DARCO’s innovative Peg Assist™ customizable off-loading insole.

OrthoWedge™ Indications:

› Post Surgical healing

› Wounds or ulcerations present under metatarsal heads and toes.

› Rearfoot trauma

› Any situation that requires a pressure off-load of the forefoot.
